Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 to 3 rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese patent 5-59446 (hereinafter JP'446), Japanese patent 2000-94100 (hereinafter JP'100) or Japanese patent 5-255816 (hereinafter JP'816) in view of US Patent 5,759,306 (hereinafter Tosaka) or US Patent 5,759307 (hereinafter Berger) for the reasons set forth in the previous office action dated August 22, 2007.

3. The English abstract of JP'446, JP'100 or JP'816, each teach a process for continuous production of steel strip wherein the strip is subjected to annealing and pickling, prior to cold rolling which closely meets the recited claims.

4. Even though prior art teaches rolling steel strip at a reduction of $\geq 50\%$ whereas Applicant's claims recite a newly amended reduction of 30-40%, such difference would not be of patentable significance. Note that cold rolling reduction rate would be a matter of choice well within the skill of artisan to select depending on the desired thickness and properties sought, which would be productive of no new and unexpected results. In addition, Applicant's specification, first full paragraph teaches present invention rolling process involves a significant reduction in the thickness of the strip, preferably by at

least 20%. There is no teaching or suggestion by Applicant that a reduction rate of 30-40% is somehow critical. Hence claims would not patentably distinguish over prior art.

Response to Arguments

5. Applicant's arguments filed February 22, 2007 have been fully considered but they are not persuasive.

6. Applicant argued that present invention teaches a reduction of 30-40% during rolling whereas prior art teaches greater amounts of reduction. In response to Applicant's arguments, see explanation in preceding paragraph 4.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
